

LiLAC

The Brief

The private finance initiative driven LiLAC, or Leeds Independent Living Accommodation company project was undertaken by the John N Dunn group to fit custom-built homes for adults in the community with learning disabilities or mental health needs with plumbing, heating and electrical services.

The solution

The LiLAC scheme gives adults with learning disabilities and mental health needs a home in which they can feel comfortable, safe and also have the opportunity to become independent and an active part of the community.

In Partnership with Leeds city council the John N Dunn group fitted the LiLAC project builds with up-to-date central heating, air conditioning and electrical systems.

The result

The LiLAC project has delivered housing to hundreds of adults with learning disabilities and mental health needs allowing them to integrate into the community and live more independent and rewarding lifestyles.
